

Dear Chad,

8/2/2010

I wanted to personally thank you for introducing your APCO product to our One Hour franchise in Largo. We have always believed in and sold UV products before but never have we seen one work as well as this! I have a personal experience that I wanted to share with you. My in laws bought a Pug puppy about a year ago and I soon discovered that I am extremely allergic to it. I have been tolerating their 2 cats and other dog but as soon as they purchased this dog, my visits to their home became shorter and shorter as I would sneeze and itch and have severe allergic reactions to this adorable puppy. This was a terrible family situation due to the fact that my mother in law who has had a traumatic brain injury mostly stays home. I am the mother of her 2 grandchildren whom she adores, ages 2 and 9. They loved going to Nana's house but my allergies made it impossible to visit. We tried everything! Bathing the dog, covering the couches, a pet dander spray, I would even take allergy medications that would make me sleepy and still, nothing worked!!

She became very sad, as her grandchildren had not been to visit for a while and worried that they were never going to come back over again. My husband (who works with me here) then decided to install the APCO dual UV bulb product to see if it really "worked". 1 week later we gave it a trial run. I did not take any allergy medications and bravely stepped into their home. Usually, within 3 minutes my nose would start to itch....but nothing. 4 hours later I was walking out after a fun visit and never sneezed once! No itchy, watery eyes or runny nose. This product really WORKS!! I have 2 UV systems at my home and I will be removing them and installing the APCO as soon as possible. I wholeheartedly believe that the APCO is the most effective UV system on the market. My husband loves the design and believes it is the best built as well. We also have recently installed 5 at our son's preschool and look forward to fewer colds and viruses. We noticed instantly that the school smelled better (less like sweaty kids and dirty diapers) and excitedly await the report from the director that shows a decline in absences due to viruses. Thanks again Chad and Triatomic, your APCO product is amazing!

Sincerely,

Jennifer Reynolds
