

FRESH-AIRE™

Sanitizing UV Light for Ice Machines

## 2009 AHR Expo Innovation Award For Fresh-Aire ICE UV™

The **Fresh-Aire ICE UV™** from **Triatomic Environmental** is a germicidal **UV light system** designed for installation in ice making machines. It helps control the growth of mold, slime and biocontamination on interior surfaces and components, resulting in **cleaner, safer ice**.

The **Fresh-Aire ICE UV™** system is **cost-effective** because the ice machine interior will remain clean longer and will require less frequent cleaning with harsh chemicals.

Manufactured by Triatomic Environmental, Inc.
